Education

Johns Hopkins University

Ph.D. in Computer Science (Advisor: Benjamin Van Durme)

Aug 2019 - July 2024

Peking University

B.S. in Physics & Computer Science

Sept 2015 - Jun 2019

Experience

Microsoft Research Lab (MSR)

Research Intern (Mentor: Corby Rosset)

Washington, US

May 2023 - Aug 2023 Keywords: Large language model (LLM), Compressed text representation, Retrieval-augmented generation (RAG).

I researched efficient methods for long-context LLMs. I proposed a method to compress the context of LLaMA with a compression ratio of up to 20x with minimal performance tradeoffs. It worked on retrieval-augmented generation (RAG).

Microsoft Semantic Machines

Remote, US

Research Intern (Mentor: Anthony Platanios)

May 2022 - Aug 2022

Keywords: Dataset, Graph neural networks (GNNs), User action prediction.

I studied a new research problem for user action predictions. I built a 2TiB dataset from GitHub and implemented a GNN model to predict the user actions (e.g. commit and pull request).

Johns Hopkins University

Maryland, US

Visiting Researcher (Mentor: Hongyuan Mei and Jason Eisner)

Jun 2018 - Oct 2018

Keywords: Time-series models, Stochastic process, Datalog.

I worked on temporal event stream modeling. We proposed a particle smoothing solution to sample events from a neural Hawkes process. The stochastic process may interact with a deductive temporal database such as Datalog.

Microsoft Research-Asia (MSRA)

Beijing, China

Research Intern (Mentor: Jin-Ge Yao and Chin-Yew Lin)

Nov 2017 - Jun 2018

Keywords: Grounded language learning, Data-to-text generation.

I proposed a Semi-HMMs-based statistics model for grounding natural language to structured data, which can be used to induce templates for data-to-text generation.

Skills

- O Programming languages: Python, Rust, JAVA, and C/C++. Other languages: Shell, LATEX, SQL.
- Experience in fine-tuning LLMs such as LLAMA, including distributed training, the use of LoRA.
- O Experience data processing for biological/medical images: I developed a plugin for ImageJ to track objects using tools such as scikit-image and scipy.
- Machine learning tools: PyTorch, Lightning AI, DeepSpeed, FAISS, and PEFT.
- O Network/Web: I have been hosting a proxy service (WallessPKU) since 2017. I implemented the proxy protocols and front-/back-end and maintain the database.

Awards

Best Short Paper Awardee in NAACL

Association for Computational Linguistics (ACL), 2021

Outstanding Reviewer in EMNLP

Association for Computational Linguistics (ACL), 2019

Silver Medalist

Chinese Physics Olympiad (CPhO), 2014
